Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: Applicants proposed amendment reciting "modifying an enzyme, by changing an amino acid residue to a cysteine, thereby creating a chemically modified mutant enzyme with one or more amino acid residues being replaced by cysteine residues..." while attempting to overcome the previous 112 second paragraph rejection, would still result in a 112 second paragraph rejection based on a lack of clarity and the proposed amendment would further require an additional search after final amendment. As previously suggested applicants attempt to incorporate of an active step of "changing an amino acid residue to a cysteine residue" as a part of the claimed method is appreciated, however, not successful in causing the withdrawal of the rejection. Specifically, the proposed amended claim would remain unclear as to the "modification" of the claimed method. While applicants proposed amendment would clearly encompass the "changing of an amino acid to a cysteine residue" it would remain unclear what if any additional modifications were also actively encompassed by the claimed method (i.e. such as the replacement of the thiol hydrogen in the cysteine with a thiol side chain). Thus applicants proposed amendment would not overcome the 112 second paragraph rejection..

Continuation of 5. does NOT place the application in condition for allowance because: the rejections of record remain in light of the non-entry of applicants proposed amendment.
